# PRO RUNNER CONTROL ARMS

## PRO RUNNER CONTROL ARMS

The new Pro Comp Pro Runner™ Control Arms deliver amazing performance and increased durability for lifted, leveled or stock trucks. The factory upper control arms have weak ball joints and stamped steel construction that is not designed to handle off road use. Pro Comp has engineered the new Pro Runner™ Control Arms utilizing oversized stainless steel FK uniball joints. The big uniball joints provide unparalleled strength over factory ball joints. Heavy duty 1.25" chromoly tubular construction and reinforced pivot bushing mounts are used to eliminate flex and handle the added load from extreme suspension cycling. Large PTMEG pivot bushings are equipped with zerk fittings for easy maintenance and quiet operation. Each arm is finished in a durable black powder coat finish for years of lasting performance.

## FEATURES

- Heavy duty chromoly construction
- Huge 1.5" "Uniball" ball joints
- Reinforced bushing mounts
- Zerk fittings for easy service
- Black powdercoat finish

| Make | Model | Year | 2/4WD | Track Width | Uniball | Part Number |

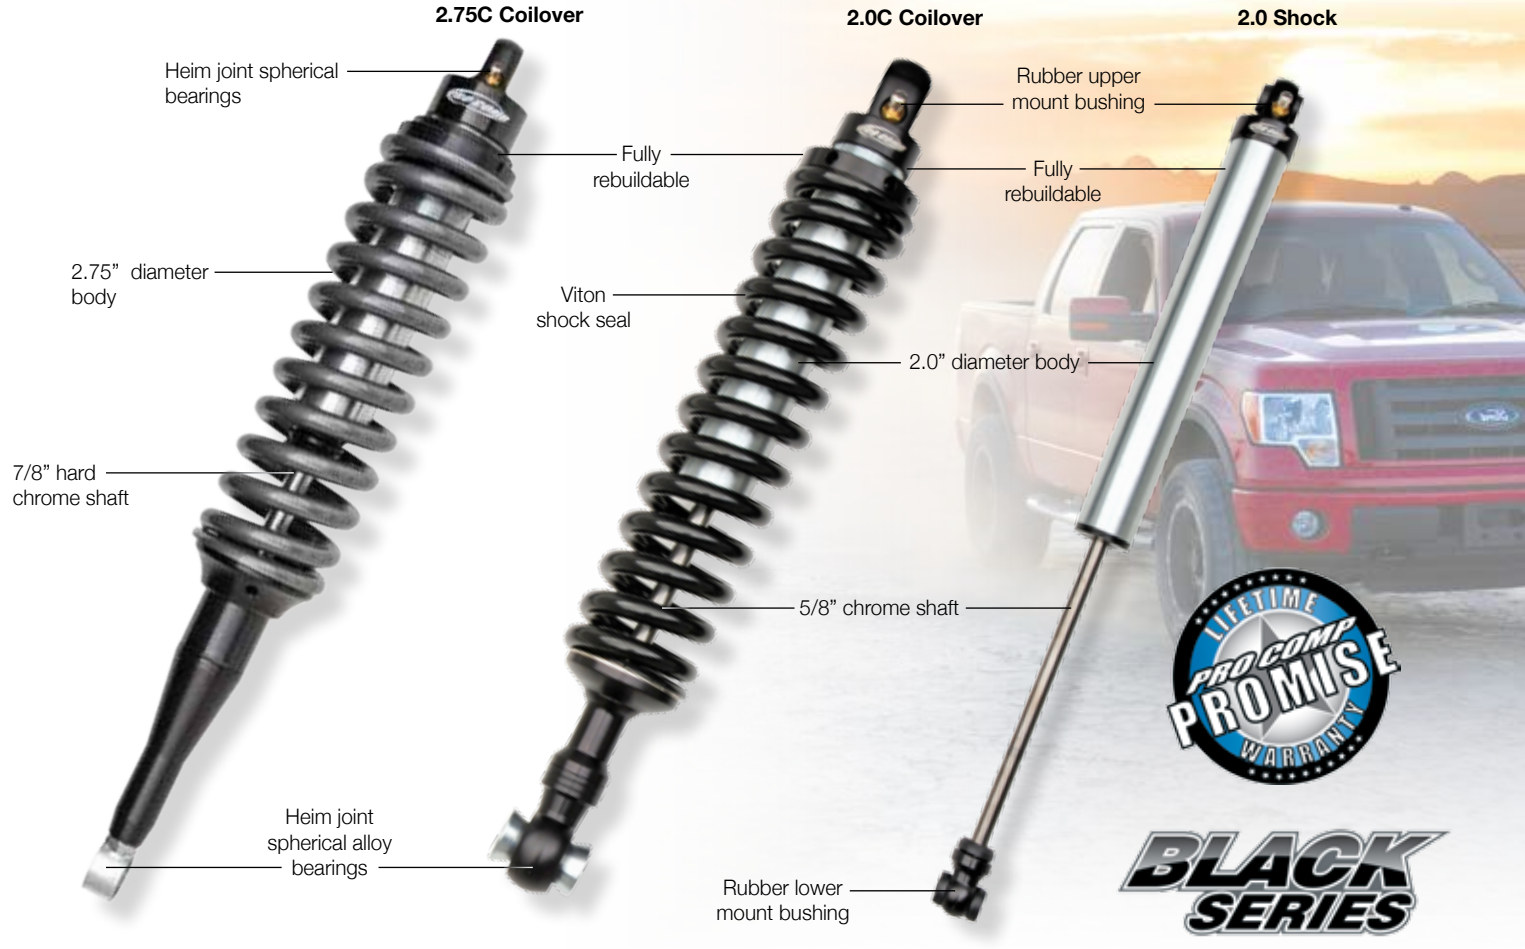
# PRO RUNNER BLACK SERIES



## PRO RUNNER 2.75C

For maximum performance and control the Pro Runner™ 2.75C coilover is the ultimate choice. The Pro Runner™ 2.75C coilovers are engineered to be the perfect compliment to the new Pro Runner™ Control Arms. These hand assembled adjustable monotube coilovers will raise the front suspension up to 2.5". They feature an over sized 2.75" zinc plated body for increased oil capacity allowing cooler operation. The upper and lower mounts are heavy-duty teflon steel alloy spherical bearings to eliminate deflection. Each unit is valved and tuned to be application specific for optimized performance and a smooth ride on and off-road.

## PRO RUNNER 2.0C

The Pro Runner™ 2.0C coilovers are loaded with premium features to deliver superior performance both on and off-road. The 2.0C units take full advantage of the Pro Runner™ Control Arms. Each unit is hand assembled to exact specifications and tuned for specific applications. Custom tuned coils and precision valving deliver optimized control and handling. Viton seales are utilized to guard against leaks. The 2" diameter zinc plated body is capped by black anodized ends for a clean look. For a complete tuned ride, rear Pro Runner™ 2.0 can be added.

# PRO RUNNER MONOTUBES

90 DAY RIDE GUARANTEE!

The Pro Runner™ Monotube shocks deliver the most "bang for your buck" when combined with the new Pro Runner™ Control Arms. At the heart of the shock is the gas-charged monotube design that delivers superior performance compared to traditional twin tube shocks. The brushed and zinc-plated, clear coated monotube body is nitrogen gas pressurized to eliminate performance-robbing cavitation during compression and rebound. This allows the shock to dissipate heat more efficiently. The Vehicle Specific Ride Tuning (VSRT™) in each shock was derived using extensive dyno and real world testing. The result is multi-stage valving to optimize the ride and handling characteristics for each application. Whether you are towing a trailer or hitting woops in the desert, you can count on Pro Comp Pro Runner™ monotubes to give you the confidence behind the wheel.

## FEATURES

- Monotube design
- Nitrogen gas charged
- Brushed and zinc-plated w/ clear coat finish
- VSRT™ - Vehicle Specific Ride Tuning
- Natural rubber bushing
- Polyurethane shock boots included
- Multi-stage disc pack
- Teflon-coated internal bearing
- Hardened chrome-plated 14mm shaft
- 90 Day Ride Guarantee
